FireVall

Firefighting Volunteering For All

2nd project meeting in Zagreb - 21st and 22nd March 2018

The second meeting of the FireVall project was held in Zagreb, Croatia. The project partners provided an overview of the strategies for recruiting/attracting new members for the volunteer fire brigades in their country. The project partners were greeted by the mascot of the Zagreb Firefighting Association, besides on the meeting two volunteer fire brigade were introduced to the attendees.

One of the Fire Brigades was Vidovec, where the work and training with children was introduced. During the visit the project partner representatives could attend a training course with children participating. The wide range of activities, the enthusiasm and skills of the children taking part in the training impressed the attendees. The Fire Brigade in Vidovec is an outstanding example and good practice regarding the involvement of children and youth into firefighting activities.

Lecture about forest fires by Devataki Plateau Association, Bulgaria

Devetaki Plateau presented the FireVall project to students from Lovech on 21.06.2018. On 21 June a group of students from Lovech led by Mrs Detelina Karapetrova was on an open-air lesson on Devetaki Plateau. The students visited Devetaki Cave and the biggest village - Gorsko Slivovo. In the cultural centre, they had a lecture about Forest fires and how to protect the nature, the importance of local fire-protection measures, and the life of the bats' colonies in the caves.

The partners of Devetaki Plateau are the following:

The 3rd meeting for FireVall

The 3rd project meeting will be held in Frederikssund, Denmark. In this meeting the project partners will share the organisation and financing of volunteer fire brigades in their country, and the good practices will be collected. After this meeting the good practices will be shared on the website of the project. During the meeting in Frederikssund the project partners will visit a fire station in Hundested and another station in Slangerup in order to get information about the activities, tools and vehicles of these stations in Denmark.
